Efe Kodzhagioz

Software Engineering Student — seeking a software engineering internship

Netherlands · kocagozefe@gmail.com · linkedin.com/in/efe-kocagoz-73995524b · github.com/efekocagozz

PROFILE

IT student at Inholland University of Applied Sciences focused on backend and full-stack software engineering. I build REST APIs and web applications with Java & Spring Boot and C# & ASP.NET Core, secure them with JWT and role-based access, and test them with JUnit and Mockito. Used to working in Scrum teams with Git and GitHub. Looking for an internship where I can contribute to a real codebase and learn from experienced engineers.

EDUCATION

BSc Information Technology — Software Engineering — 2024 — Present

Inholland University of Applied Sciences, Haarlem

- Coursework: OOP, web development, databases (SQL & NoSQL), software architecture, networking; a Scrum team project every semester.

PROJECTS

Banking Application · Team of 4 — github.com/RashidIsmayilzada/Banking-App

- Designed and implemented the REST endpoints behind the admin panel of a full-stack banking app (Spring Boot API, Vue.js 3 frontend).
- Implemented authentication and role-based authorization with Spring Security and JSON Web Tokens.
- Documented the API with OpenAPI / Swagger UI; added rate limiting with Bucket4j.
- Wrote unit and functional tests with JUnit, Mockito and AssertJ; containerised with Docker and deployed on Railway.

Java 21 · Spring Boot · Spring Security · Spring Data JPA · Hibernate · H2 · Vue.js 3 · JWT · Maven · Docker

SportsMeet · Personal project — github.com/efekocagozz/sportsmeet-v2

- Built a web app for creating and joining local sports events, end to end: database, API and UI.
- Wrote a custom PHP REST API with JWT-based authentication and authorization on top of SQLite.
- Built the frontend with Vue 3, Pinia and Tailwind CSS, documented components in Storybook, and containerised both tiers with Docker.

PHP · Vue 3 · Vite · Pinia · Tailwind CSS · Storybook · SQLite · JWT · Docker

Incident Management System · Team project — github.com/DarlingtonJones24/NOSQLDatabaseProject

- Built a support-ticket system in ASP.NET Core MVC with CRUD, priority levels, filtering and a statistics dashboard.
- Modelled ticket data in MongoDB Atlas via the official .NET driver; secured accounts with BCrypt and cookie authentication.

C# · ASP.NET Core MVC · MongoDB Atlas · Razor · BCrypt

Restaurant Ordering System · Team project — github.com/efekocagozz/RestaurantOrderingSystem

- Built order, menu, table, employee and payment management for a restaurant in ASP.NET Core MVC.
- Applied a layered architecture (MVC, Repository pattern, Service layer) on SQL Server, hosted on Azure SQL.

C# · ASP.NET Core MVC · SQL Server · Azure SQL · Razor

TECHNICAL SKILLS

Languages	Java, C#, SQL, PHP, JavaScript, HTML, CSS
Frameworks	Spring Boot, Spring Security, Spring Data JPA, ASP.NET Core MVC, Vue.js 3, Tailwind CSS
Databases	SQL Server, Azure SQL, MongoDB, SQLite, H2; relational and document data modelling
Testing & APIs	JUnit, Mockito, AssertJ, REST API design, OpenAPI / Swagger, JWT
Tools	Git, GitHub, GitHub Actions, Docker, Maven, Linux
Practices	OOP, MVC & layered architecture, Agile / Scrum

OTHER EXPERIENCE

Hospitality & DJ work

- Kept day-to-day bar operations running smoothly in a fast-paced environment and performed as a DJ at events, building clear communication and composure under pressure.
