PROFESSIONAL PROFILE

Information Technology student at Inholland University of Applied Sciences with over two years of hands-on coding experience building full-stack and backend applications across Java Spring Boot, C# ASP.NET Core, PHP, and Vue.js. Experienced in designing RESTful APIs, relational and NoSQL database architectures, and containerized deployments within Agile/Scrum teams. Seeking an entry-level role or internship in software development, backend engineering, application support, or IT operations.

TECHNICAL SKILLS

Category	Technologies & Competencies
Languages	Java (21), C#, PHP, SQL, JavaScript, HTML5, CSS3
Frameworks & Libraries	Spring Boot, Spring Security, Spring Data JPA, Hibernate, ASP.NET Core MVC, Razor Views, Vue.js 3, Pinia, Vue Router, Tailwind CSS, Bootstrap
Databases	SQL Server, Azure SQL, PostgreSQL, MongoDB (Atlas), SQLite, H2
DevOps, Testing & Tools	Docker, Git, GitHub Actions (CI/CD), Linux, Railway, Maven, Vite, OpenAPI (Swagger UI), JUnit, Mockito, AssertJ, Bucket4j, Storybook
Architecture & Methodologies	RESTful API Design, Object-Oriented Programming (OOP), MVC Pattern, Repository & Service Layer Patterns, JWT & Cookie Authentication, Agile/Scrum

SOFTWARE DEVELOPMENT PROJECTS

Full-Stack Banking Application

Java 21, Spring Boot, Vue.js 3, H2, Docker, Railway

- Collaborated in a four-person Agile team to architect and deliver a full-stack banking system with a Spring Boot backend and Vue.js 3 frontend.
- Designed and implemented RESTful APIs for the administrative management panel, documenting and testing endpoints with OpenAPI (Swagger UI) and rate-limiting with Bucket4j.
- Engineered stateless authentication and role-based access control (RBAC) using Spring Security and JSON Web Tokens (JWT).
- Wrote comprehensive unit and functional test suites using JUnit, Mockito, and AssertJ, managing version control and code reviews via Git and GitHub.

SportsMeet — City Sports Event Platform

PHP, Vue 3, Tailwind CSS, SQLite, Docker

- Designed and developed a full-stack web application enabling local users to organize and join community sports events.
- Built a custom PHP REST API with JWT-based authentication and authorization connected to a persistent SQLite database.
- Created a responsive frontend using Vue 3, Vite, Pinia state management, Vue Router, Axios, and Storybook, containerizing both frontend and backend services with Docker.

Incident Management System

C#, ASP.NET Core MVC, MongoDB Atlas, BCrypt

- Developed a support ticket tracking and incident resolution platform within a collaborative project team using the ASP.NET Core MVC pattern.
- Integrated cloud-hosted NoSQL persistence using MongoDB Atlas and the official MongoDB .NET Driver.
- Built end-to-end ticket management workflows featuring CRUD operations, priority-level assignments, custom search filtering, secure Cookie Authentication with BCrypt hashing, and real-time dashboard analytics.

Restaurant Ordering & Management System

C#, ASP.NET Core MVC, SQL Server, Azure SQL

- Collaborated in an Agile team to build an end-to-end restaurant operations platform handling table orders, menus, staff scheduling, and payment processing.
- Structured the backend using a clean, multi-layered architecture (MVC, Repository Pattern, and Service Layer) to decouple business logic from data access across SQL Server and Azure SQL.

EDUCATION

BSc in Information Technology

2024 – Present

Inholland University of Applied Sciences — Haarlem, Netherlands

- **Core Focus:** Software Engineering, Backend Development, Relational & NoSQL Data Management, System Design, Networking, and Agile Project Collaboration.
- **Key Coursework Deliverables:** Built full-stack applications in Java and C#, designed hybrid database architectures combining SQL and MongoDB, and developed a summer camp management platform.

ADDITIONAL EXPERIENCE

Hospitality & Bar Operations / Event DJ

- Managed daily bar operations in high-volume hospitality venues, ensuring smooth service delivery, inventory coordination, and clear team communication under pressure.
- Adapted quickly to fast-paced, client-facing environments while maintaining composure and operational reliability.
